SUMMARY

Full-stack developer with hands-on experience designing and developing web applications using React.js, Node.js, Express.js, and MongoDB. Passionate about building scalable software, writing clean and maintainable code, and continuously learning modern technologies.

EXPERIENCE

IReply Back Office Services, Inc. – Full-Stack Developer

February 2026 – April 2026

- Collaborated with the development team to design and develop the Remote Digital Signage & PA Controller, designing backend architecture and database models, enabling scalable media management and device communication.
- Developed RESTful APIs using Express.js and validated endpoints with Postman, ensuring reliable communication and seamless integration between frontend, backend, and database services.
- Integrated frontend, backend, and database components into a unified application, delivering centralized remote media management and public announcement functionality.

PROJECTS

ALRes – AI-Powered Resume Builder. (React.js, Node.js, Express.js, MongoDB, Tailwind CSS)

- Developed a full-stack AI-powered resume builder using React.js and Express.js, enabling users to generate ATS-friendly resumes efficiently.
- Integrated Gemini AI, Groq AI, and Google OAuth authentication, streamlining resume creation while providing secure user access.
- Implemented cloud-based resume storage and PDF export functionality, allowing users to manage and download professional resumes seamlessly.

LIGTAS – Location-Integrated Transmission and Alert System. (Capstone) (React.js, Node.js, Express.js, MongoDB)

- Engineered an emergency alert and monitoring system for disaster communication in areas without cellular connectivity, providing an alternative communication solution during emergencies.
- Developed a real-time monitoring dashboard using React.js and WebSocket, allowing responders to receive distress alerts and monitor field device locations instantly.
- Integrated interactive mapping, device registration, and GNSS-based location tracking, improving emergency response coordination and situational awareness.

ALearn – AI-Powered Learning Platform. (React.js, Node.js, Express.js, MongoDB, Tailwind CSS)

- Engineered an AI-powered learning platform that automatically generates flashcards and quizzes from user topics, making study material creation faster and more efficient.
- Integrated Groq Llama 3.1 to generate AI-powered explanations and personalized learning content, enhancing the overall learning experience.
- Developed responsive dashboards and study deck management features, allowing users to organize and access learning resources efficiently.

TECHNICAL SKILLS

Languages: JavaScript, Python, Java, C++, HTML5, CSS3

Frameworks/Libraries: React.js, Node.js, Express.js, Tailwind CSS

Databases: MongoDB

Tools & Technologies: Git, GitHub, Postman, WebSocket, REST APIs, Google OAuth

EDUCATION

Bachelor of Science in Computer Engineering

2022 – 2026

Carlos Hilado Memorial State University, Bacolod City, Negros Occidental
