SUMMARY

Full-stack developer with hands-on experience building web applications using React.js, TypeScript, Node.js, Express.js, MongoDB, and PostgreSQL. Experienced in developing responsive user interfaces, RESTful APIs, database-driven applications, authentication, and real-time web systems. Strong foundation in software development with a focus on writing clean, maintainable code and continuously expanding technical skills.

EXPERIENCE

IReply Back Office Services, Inc. – Full-Stack Developer (Internship)

February 2026 – April 2026

- Designed backend architecture and database models for a Remote Digital Signage & PA Controller, supporting centralized media management and device communication.
- Developed RESTful APIs using Express.js and validated API endpoints with Postman, integrating frontend, backend, and database services.
- Integrated React frontend components with backend services and database functionality to deliver remote media management and public announcement features.

PROJECTS

Zoqelle – Luxury Artisanal Bakery E-Commerce Platform (React.js, TypeScript, Supabase, PostgreSQL, Tailwind CSS)

- Developed a full-stack e-commerce platform with product browsing, cart management, checkout, and order tracking functionality.
- Built separate customer and admin interfaces using React.js and TypeScript, integrating Supabase Authentication and PostgreSQL.
- Implemented Row-Level Security (RLS), inventory management, and order management to support secure customer and administrative workflows.

ALRes – AI-Powered Resume Builder (React.js, Node.js, Express.js, MongoDB, Tailwind CSS)

- Developed a full-stack resume builder with customizable resume creation, editing, cloud storage, and PDF export functionality.
- Integrated Gemini AI and Groq AI to assist with resume content generation and enhancement.
- Implemented Google OAuth authentication and user-specific resume storage for secure access and resume management.

LIGTAS – Location-Integrated Transmission and Alert System (Capstone) (React.js, Node.js, Express.js, MongoDB)

- Engineered an emergency alert and monitoring system designed for disaster communication in areas without cellular connectivity.
- Developed a real-time monitoring dashboard using React.js and WebSocket for receiving distress alerts and monitoring field devices.
- Integrated interactive mapping, device registration, and GNSS-based location tracking to support emergency response coordination.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, C++, HTML5, CSS3

Frameworks/Libraries: React.js, Node.js, Express.js, Tailwind CSS

Databases: MongoDB, PostgreSQL

Tools & Technologies: Git, GitHub, Supabase, Postman, WebSocket, REST APIs, Google OAuth, Linux/Bash, Canva, Figma

EDUCATION

Bachelor of Science in Computer Engineering

2022 – 2026

Carlos Hilado Memorial State University, Bacolod City, Negros Occidental

- Dean's Lister — 5 Terms
